Dear Bruce:

I wanted to let you know how much we appreciated your work on our recent ADA-related entrance door project. Your organization and scheduling made it possible for Blue Cross to maintain access to our four buildings while we replaced the eight existing entrances with automatic sliding doors to make our facility more accessible to the disabled. We also appreciated the way you kept us in Facilities Planning and the Building Operations Manager informed of construction activity on site, and your availability throughout the job.

We look forward to working with you again on upcoming projects.

Sincerely,

Jerry Newman, AIA
Corporate Architect
Facilities Planning
